Last year the Mediator Standards Board (MSB) conducted a series of discussion forums that focused on the training and assessment delivery methods being used for NMAS courses. These forums were incredibly valuable. Feedback from the mediation community assisted us in developing the MSB website, and in focusing on projects that will enhance the application of the NMAS.

Across Australia we received unanimous feedback regarding the value of these forums in creating a community of practice for RMABs, training providers, and organisations providing mediation services. With this in mind we are pleased to launch our 2018 Discussion Forum Series.

We hope that you can be part of the conversation.
