

Caroline Malcolm

Senior Advisor

Blockchain and Tax

OECD (Organisation for Economic
Co-operation and Development)

Caroline is the senior advisor on blockchain and tax at the OECD.

Her career began as a lawyer at the Australian Government Solicitor before she joined the OECD in 2010, to work on international tax transparency issues. She went on to set up the OECD-UNDP Tax Inspectors Without Borders initiative and then became the advisor to the OECD's Head of Tax during the OECD/G20 BEPS (Base Erosion and Profit Shifting) Project. During this time, Caroline became increasingly interested in the impact of emerging technologies, and in 2018, began the first global study of the tax treatment of crypto-currencies.

Caroline went on to become the founding Head of the OECD's Global Blockchain Policy Centre, working on a diverse range of blockchain-related policy issues, such as fintech, competition policy, data governance, and supply chain transparency. In 2019, she co- led the Financial Stability Board's workstream on decentralised fintech, and also established the OECD's Blockchain Expert Policy Advisory Board, bringing together more than 100 experts from across the world in government, industry, academia and civil society. In 2020, Caroline was named "Young Global Leader" by the World Economic Forum, and was a judge in the G20 techsprint hackathon.
